SUMMARY

Computer Science (Software Engineering) student at MMU with hands-on experience building full-stack applications, backend APIs, and AI-powered platforms across React, FastAPI, and Dockerized workflows. Comfortable with testing, CI/CD, and Unix-based environments, and quick to learn new tools; seeking a software engineering internship.

EDUCATION

Multimedia University

BSc (Hons) Computer Science – Software Engineering

- CGPA: 3.80/4.00 | Dean's List Award (3 semesters)

Cyberjaya, Malaysia

Aug. 2024 – Aug. 2027 (Expected)

EXPERIENCE

IQ-Tech Solutions

Junior Software Developer

Bangalore, India (Remote)

Sep. 2025 – June 2026

- Developed and maintained 8+ responsive web application modules using HTML, CSS, JavaScript, PHP, and MySQL, improving functionality and user experience for client projects
- Reduced bug resolution time by 25% by debugging and testing issues before deployment, collaborating with a cross-functional team through Git and Agile code reviews on a Unix-based (Linux) workflow

RBN Group of Companies

IT Support & Systems Assistant

Doha, Qatar

March 2024 – July 2024

- Provided technical support for 40+ employees by troubleshooting hardware, software, and network issues, maintaining a 95%+ first-response resolution rate

PROJECTS

Voidfall | Python, FastAPI, PostgreSQL, Redis, React, TypeScript | [GitHub](#)

Apr. 2026 – June 2026

- Built a natural-language RPG engine with a deterministic ECS core and custom SplitMix64 RNG for fully reproducible runs; LLM (OpenAI/Gemini/Ollama) only narrates outcomes and cannot alter game state
- Shipped a FastAPI backend with JWT auth, per-user cloud saves, Redis caching with read-through invalidation; React 18/TypeScript frontend with vector-to-ASCII rendering and procedural Web Audio

RouteWise | Flask, Google OR-Tools, OSRM, Docker | [GitHub](#)

Feb. 2026 – Mar. 2026

- Built a multi-stop route optimizer using Google OR-Tools with real driving times from OSRM; supports 3 trip modes and workload balancing across up to 5 vehicles
- Designed a REST API (8 endpoints) for optimization, strategy comparison, and geocoding; containerized with Docker and gunicorn for production

PrepAI | Next.js 16, React 19, TypeScript, Tailwind CSS, Gemini API | [GitHub](#)

Jan. 2026 – Feb. 2026

- Built an AI mock interview platform spanning 5 topics, 3 difficulty levels, and 5 question formats, with timed sessions, Gemini-powered grading, detailed feedback, and history for 20 sessions

TECHNICAL SKILLS

Languages: Python, Java, C++, TypeScript, JavaScript, PHP, HTML/CSS, SQL

Frameworks & Frontend: React (Hooks, Context state management), Next.js, Node.js, Flask, FastAPI

Tools & DevOps: Git, Docker, GitHub Actions (CI/CD), Linux/Unix, REST APIs, JWT, pytest

Databases: PostgreSQL, MySQL, SQLite, Redis

Soft Skills: Problem-solving, self-learning, technical explanation, collaboration, applying feedback,
