SUMMARY

Computer Science (Software Engineering) student at MMU with hands-on experience building full-stack applications, backend APIs, optimization engines, and AI-powered platforms. Proficient in Python, Java, C++, TypeScript, React, FastAPI, PostgreSQL, Docker, and Git; seeking a software engineering internship.

EDUCATION

Multimedia University

Cyberjaya, Malaysia

BSc (Hons) Computer Science – Software Engineering; CGPA: 3.80/4.00

Aug. 2024 – Aug. 2027 (Expected)

- Dean's List Award (3x)

EXPERIENCE

IQ-Tech Solutions

Bangalore, India (Remote)

Junior Software Developer

Sep. 2025 – June 2026

- Developed and maintained 8+ responsive web application modules using HTML, CSS, JavaScript, PHP, and MySQL, improving functionality and user experience for client projects
- Collaborated with a cross-functional development team using Git and Agile practices to implement new features, review code, and deliver software updates on schedule

RBN Group of Companies

Doha, Qatar

IT Support & Systems Assistant

March 2024 – July 2024

- Provided technical support for 40+ employees by troubleshooting hardware, software, and network issues, maintaining a 95%+ first-response resolution rate

PROJECTS

Voidfall | Python, FastAPI, PostgreSQL, Redis, React, TypeScript | [GitHub](#)

2026

- Built a natural-language RPG engine with a deterministic ECS core and custom SplitMix64 RNG for fully reproducible runs; LLM (OpenAI/Gemini/Ollama) only narrates outcomes and cannot alter game state
- Shipped a FastAPI backend with JWT auth, per-user cloud saves, Redis caching with read-through invalidation; React 18/TypeScript frontend with vector-to-ASCII rendering and procedural Web Audio

RouteWise | Flask, Google OR-Tools, OSRM, Docker | [GitHub](#)

2026

- Built a multi-stop route optimizer using Google OR-Tools with real driving times from OSRM; supports 3 trip modes and workload balancing across up to 5 vehicles
- Designed a REST API (8 endpoints) for optimization, strategy comparison, and geocoding; containerized with Docker and gunicorn for production

PrepAI | Next.js 16, React 19, TypeScript, Tailwind CSS, Gemini API | [GitHub](#)

2026

- Built an AI mock interview platform spanning 5 topics, 3 difficulty levels, and 5 question formats, with timed sessions, Gemini-powered grading, detailed feedback, and history for 20 sessions

TECHNICAL SKILLS

Languages: Python, Java, C++, TypeScript, HTML/CSS

Frameworks: React, Next.js, Flask, FastAPI

Tools & Platforms: Git, Docker, GitHub Actions, PostgreSQL, Redis, REST APIs, JWT, pytest
